

## 1. Overview of the Annotator's Job

As an annotator, your task is to read the Comments and classify them into one of four information categories: **High-Value**, **Mid-Value**, **Low-Value**, **Noisy**. The purpose of this classification is to analyze the usefulness of comments in discussions about technology. Your classification should be based on the **relevance, informativeness, and clarity** of the comment. You do not need any prior knowledge about the technology being discussed. Instead, follow the guidelines below to ensure consistency.

## 2. Labels, Rules, Examples, Reasons

Label	High-Value
Rules	<ul style="list-style-type: none"> <li>- The comment provides <b>clear, detailed, and insightful</b> information related to the post.</li> <li>- It contains <b>specific facts, technical knowledge, or well-reasoned opinions</b> that contribute significantly to the discussion.</li> </ul>
Example	<p>"To be honest I just tried deepseek for the first time and watching it's reasoning processes is extremely cool.</p> <p>I had it write a crossover plot between the Inbetweeners and the Buffy the vampire slayer show and watching it reasoning how every character might react and what they would do.</p> <p>Just cool seeing the way it thinks things out really but the final answers are similar to gpt etc I will say it feels faster though."</p>
Reason	This comment offers a detailed personal experience, highlights a specific feature of DeepSeek, and provides a comparison with another AI model, making it highly informative and valuable

Label	Mid-Value
Rules	<ul style="list-style-type: none"> <li>- The comment <b>contributes</b> to the discussion but <b>lacks depth or supporting</b> details.</li> <li>- It may be <b>useful, but not insightful</b> to understanding the topic.</li> </ul>
Example	<p>"Because there's no one serious left on Facebook.</p> <p>Last time I logged in, it was oddly creepy - like when your flight lands super late at night and the massive international airport is mostly empty."</p>

Reason	The comment is relevant and adds an interesting perspective but lacks depth or direct technical insights.
--------	---

Label	<b>Low-Value</b>
Rules	- The comment is <b>vague, generic, or repetitive</b> and <b>does not add meaningful discussion</b> .
Example	"Oh no the data based on stolen content got stolen again"
Reason	The comment is <b>vague and lacks detail</b>

Label	<b>Low-Value</b>
Rules	<ul style="list-style-type: none"> <li>- The comment is completely <b>irrelevant, spam, or nonsense</b>.</li> <li>- It may include <b>trolling, jokes, advertisements, or personal attacks</b>.</li> </ul>
Example	"Bro retarded"
Reason	The comment is a personal attack
